

WHAT IS DISHAA?

DISHAA is a tool to help veterinary surgeons and owners assess the mental acuity of a dog

D

DISORIENTATION

- Dog stares blankly at walls, floor or into space
- Gets stuck or has difficulty getting around objects
- Does not recognise familiar people

I

INTERACTION – SOCIAL RELATIONSHIPS

- Decreased interest or time spent in petting
- Spending more time alone or away from family members
- More clingy or fearful

S

SLEEP/WAKE CYCLES ALTERED

- Restless or waking at night
- Night-time vocalisation
- Sleeps noticeably more during the day

H

HOUSE SOILING, LEARNING AND MEMORY

- Decrease or loss of signalling to go out
- Decreased response to learned commands like name, tricks, etc
- Difficulty getting dog's attention/increased distraction

A

ACTIVITY ALTERED

- Decreased exploration or playing with toys
- Decreased interest in playing with family members
- Repetitive behaviours like licking, circling, chewing

A

ANXIETY

- Increased anxiety when separated from owners
- More reactive/fearful to auditory stimuli
